Mediplus Peripheral IV Connectors

Safer, more efficient drug delivery

40

Years of innovative patient care

Mediplus Peripheral IV Connectors

Safer, more efficient drug delivery

Mediplus peripheral IV connectors are designed to ensure optimal drug delivery for enhanced safety in ICU, HDU, orthopaedic and obstetric departments. These high-performance connectors offer a wide range of benefits including:

Enables rapid emergency response – the high-flow anti-reflux valve (Coventry Connector and High Flow Y Connector) offers a uniquely fast flow rate for rapid IV fluid delivery and prevents back flow into the IV line

Greater control – the integrated anti-siphon valve prevents free flow and back flow, reducing the risk of over or under dosing during infusion

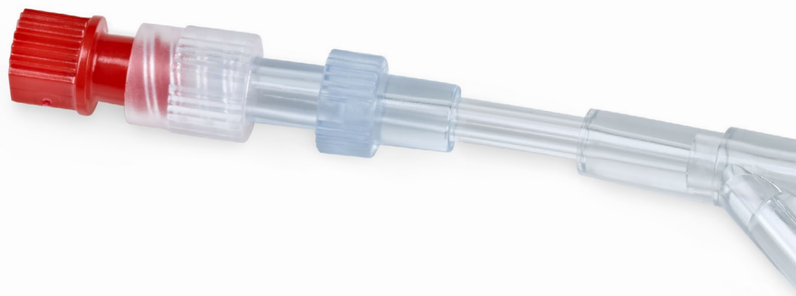
Comfort & convenience – the removable bridge (Coventry and Chalfont Connectors) helps prevent the device becoming dislodged and keeps it compact for greater patient comfort and manoeuvrability

Ergonomic design – the J-loop design (Coventry and Chalfont Connectors) prevents kinking and occlusion of tubing for unimpeded flow

Wide range – single, double or triple infusion options available

"I have been using the Coventry Connectors for more than 10 years now and I find them really useful. The multiple ports make it easy to run multiple infusions and fluids together. They are kink resistant and the rate of fluid flow is really good"

Payal Kajekar,
Luton & Dunstable Hospital



Mediplus Peripheral IV Connectors

Safer, more efficient drug delivery

Key features

J-loop to prevent kinking/occlusion of the tubing

Removable bridge offers more flexibility when moving patients

Anti-siphon valves to prevent back flow and free flow

Wide bore gravity line to allow high flow of IV fluid

Anti-reflux valve to prevent back flow

Reduced tube length, improving high flow rate

Peripheral IV connector range:

Chalfont Connector

Coventry Connector

High Flow Y Connector

Ordering information

Product Code	Product Name	Product Description	Box Quantity
6507	Chalfont	Double lumen extension set: 1 x anti-siphon, 1 x high-flow back check valve (13cm/5”)	50
6510	Coventry	Triple lumen extension set: 2 x anti-siphon, 1 x high-flow back check valve (17cm/7”)	50
6517	High Flow Y	Double lumen extension set: 2 x high-flow back check valve (13cm/5”)	50
